

Btrack Solutions Ltd relocates to new Somerset HQ

Btrack Solutions Ltd has moved to a new purpose built Head Office in Frome Somerset. The move is part of Btrack's ongoing expansion in 2007 which has seen both client support and field engineering roles expanded. The offices will house Btrack Sales Support and Administration Teams as well as a new product testing laboratory for final inspection of bespoke systems. Research, development and manufacturing will continue to take place in Wiltshire with a new expanded facility being opened early in the summer of 2007. Andy Walker Comments: "We decided to purchase purpose built premises which were big enough for our administration teams to expand into over the next 5 years." "The decision to purchase rather than lease these facilities underlines our long term commitment to both existing and prospective clients."
